AB- <NV> NOVELTY - A security controller systematically redistributes
    divided data portions of a database, in corresponding distributed
    memory units. An access controller is operable to retrieve a selected
    record of the database.|
AB- <BASIC> DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the
    following:
        (1) Computer system;
        (2) Electronic commerce system; and
        (3) Method of operating database administrator.
        USE - Used in electronic commerce system (claimed).
        ADVANTAGE -- Ensures security by checking valid combination of user
    identification and password.
        DESCRIPTION OF DRAWING(S) - The figure shows the flowchart
    explaining database administrator operation.
